PROTECTION & RELIABILITY
OPTIMIZATION INSTRUMENTS
A CTC COMPANY

VIBRATION SWITCH KITS

- Cost-effective alternative for 24/7 protection
- Flexible placement for accurate readings
- Daylight readable display

PMX1000 Series
1-2 Channel Process Control Enclosure with Display and Relay or Display Only

- Relays trigger alarm or shutdown
- Displays IPS, g's, mils or custom scale

LP252 & LP254 Series
Low cost loop power sensor, velocity, 4-20 mA output

- Peak and RMS Outputs Available
- 4-20 mA current proportional to vibration

CB111-A2A
Teflon® Jacketed cable with 2 Socket MIL-style connector

- 2 Pin MIL-Style connector
- Durable Yellow Teflon® jacket

Additional options for your specific application:

VSK2000

MVR1000 Series
Four channel compact vibration monitoring system

- SPDT (Form C) 2 relays each
- Sunlight viewable display
- Dynamic external outputs

AC192 & AC194 Series
Compact, Multi-purpose Accelerometers

- High performance, low noise
- Affordable pricing

CB111-A2A
Teflon® jacketed cable with 2 Socket MIL-Style connector

- Standard 2 Socket MIL-Style
- durable Yellow Teflon®

VSK3000

RXE150 Series
Signal Conditioner & Relay Enclosure

- Field configurable, multi-channel
- Dynamic output

AC192 & AC194 Series
Compact, Multi-purpose Accelerometers

- High performance, low noise
- Affordable pricing

CB111-A2A
Teflon® jacketed cable with 2 Socket MIL-Style connector

- Standard 2 Socket MIL-Style
- durable Yellow Teflon®
